Education

Bachelor of Science in Computer Science

Lake Washington Institute of Technology

Kirkland, WA

September 2026 - August 2028 (Expected)

Associate of Applied Science - Transfer in Computing and Software Development

Lake Washington Institute of Technology

Kirkland, WA

July 2023 - December 2025

- **Awards:** 1x Quarterly President's List Honor, 3x Quarterly Dean's List Honor
- **Certifications:** Web Development

Experience

Lead Developer at Production Roleplay Community

November 2021 - May 2025

- Architected and implemented scalable backend systems in **Lua** and **TypeScript**, supporting **225+ concurrent users** with secure **SQL** integrations.
- Designed normalized relational databases (**3NF**), implementing indexing and query optimizations that significantly reduced **database response times**.
- Built **responsive and accessible React**-based UIs using **TypeScript** and **Sass**, improving user experience and reducing support issues.
- Managed **CI/CD workflows** and version control using **Git/GitHub**, and tracked agile tasks via **Jira**.
- Led **code reviews** and mentored fellow developers, improving **code quality** and **deployment stability**.

Featured Projects

GhostEye (FiveM-Based Anti-Cheat)

TypeScript, discord.js, SQL, npm

- Engineered a **real-time anti-cheat framework** for a FiveM multiplayer environment, leveraging **server-client validation**, **behavioral analysis**, and **event inspection**.
- **Built detection systems** for **injection-based exploits**, **event/command spoofing**, and **abnormal player state manipulation**, improving detection accuracy and minimizing false positives.
- **Developed automated enforcement pipelines** with **logging**, **screenshot capture**, and **real-time alerting**, enabling faster incident response and moderation actions.
- **Integrated Discord bots** using **discord.js** to deliver **real-time alerts** and **moderation tools**, streamlining admin workflows and reducing response time.

Game Inventory System

React.js, Redux, Vite, TypeScript, Sass, SQL

- Implemented **advanced item interactions** including moving, stacking, splitting, and real-time transfers between multiple containers.
- Designed intuitive **drag-and-drop functionality** and **keyboard shortcuts** to improve speed, usability, and workflow efficiency.
- Leveraged **Redux** for **global state management** to ensure **instant UI updates** and predictable state flow.
- Engineered backend synchronization logic to maintain **data consistency**, **persistence**, and **SQL table integrity**.

Skills

Programming Languages: Lua, JavaScript, TypeScript, SQL, HTML, CSS, Sass

Libraries and Frameworks: React.js, jQuery, Material UI, Tailwind CSS

Tools and Platforms: GitHub, GitLab, Git, Jira, Vite, NPM, MySQL, Netlify, Postman, JSON

World Languages: English, Spanish
